Features

Heating settings: The oil filled radiator has 3 heating settings, to adjust the heating capacity according to the desired room temperature.

Adjustable thermostat: The user can control the required room temperature easily by using the adjustable thermostat.

Overheat protection: An automatic power shut off protects the system from overheating.

Design: The oil filled radiator is part of a robust range of Qlima products.

Full colour box: The unit is delivered completely with auxiliary parts in a full coloured box showing applications and operation information in several languages.

Digital room temperature setting: Allows the user to set a set-point temperature which will be maintained whenever the timer is programmed to be on.

Portable heater: The heater is provided with castors and an integrated handle to enable easy movement of the heater.

Timer: Timer can be set up to 24 hours. The unit switches off or on automatically when the set time has run down.

Power indicator light: This light will show the user if the power of the heater is switched on or off.

Power cord storage: The heater is provided with a power cord storage facility.

Tip over switch: The tip-over switch will automatically shut the heater off when the unit is turning over.

Digital LCD: Highest quality customized digital picture screen.
